PROFESSIONAL SUMMARY

Certified Blue Prism professional and results-driven **RPA Developer** with 5 years' experience in **Blue Prism** RPA technology, delivering robust, end-to-end automations from design to go-live. Proven ability to cut manual processing time by up to 80%, automate 1,000+ hours annually, and improve process accuracy by 25%, with operational cost savings. Skilled in C#, SQL, HTML, JavaScript, and JIRA, with a track record of streamlining complex business processes at scale.

PROFESSIONAL EXPERIENCE

1. Company Name : Perficient, Inc.

- **Designation** : Automation – Senior RPA Developer
- **Duration** : July 2021 – March 2026
- **Responsibilities** :
 - Delivered 20+ automation projects built primarily in Blue Prism, leveraging key components such as Objects, Processes, Work Queues, Schedules, and Credentials, resulting in a 50–60% reduction in manual effort.
 - Collaborated with business analysts and SMEs to identify and automate complex workflows, ensuring scalable and business-aligned automation solutions.
 - Conducted unit testing, debugging, and production support, maintaining process stability and continuously improving automation reliability.
 - Worked across multiple automation platforms including UiPath, Appian, Microsoft Power Automate and ServiceNow ITMS tool applying best practices to design scalable, high-performing RPA solutions.

2. Company Name : CGI

- **Designation** : Senior Software Engineer
- **Duration** : March 2026 – Present
- **Responsibilities** :
 - Provided L2/L3 production support for Blue Prism automations and ensured smooth business operations
 - Monitored bots and queues through Control Room, handled failed sessions, and ensured SLA compliance

TECHNICAL SKILLS

- **RPA Tool:**
 - **Blue Prism v7.x** (Advance)
 - **UiPath, Power Automate Desktop** (Basic)
- **RPA components** - Process Studio, Object Studio, Work Queue, Control Room, Scheduler, Package, System Manager, UiPath Studio, UiPath REFramework, Orchestrator, Version Control, Login Agent, Credential Manager, Environment Variable, Web API Services.
- **Automation Type:** Web, Desktop, Mainframe, Excel, PDF, Email, Database Automation, Surface Automation, SAP, API, OCR.
- **Programming Languages:** HTML, CSS, JavaScript, Python, Java, C#, VB, SQL.
- **REST / SOAP API**
- **JIRA / ServiceNow Ticketing Tool**
- **Generative AI**
- **N8N**
- **Documentation:** PDD, SDD, Test Case, Process Flow and Reporting.

PROJECTS WORKED ON

- Project Title** : Duplicates Claim Management and Enhancement
Client : Blue Cross Blue Shield of Massachusetts (BCBSMA)
Application used : RPA – Blueprism, Mainframe Application, Excel, Web Application, Salesforce API
Briefing : The Duplicate Claim Check process reviews claim history across multiple applications to identify and manage duplicate claims by checking if a service has already been paid. Developed end-to-end automation solutions, reducing manual processing time by 40%. Improved accuracy of duplicate claim detection by 25%, resulting in

significant cost savings.

- 2. Project Title** : **RTMS Mainframe Application Screen Scrap**
Client : Blue Cross Blue Shield of Massachusetts (BCBSMA)
Application used : RPA – Blueprism, Mainframe Application, MS Word, PDF, Excel
Briefing : This process is to capture the information of various plans from RTMS Application and Generate the PDF file of various screen of RTMS, significantly reduced the manual effort involved in validating plans
- 3. Project Title** : **Update RTMS and Member Rights Comments Process**
Client : Blue Cross Blue Shield of Massachusetts (BCBSMA)
Application used : RPA – Blueprism, Mainframe Application, Excel
Briefing : The Update RTMS and Member Rights Comments process involves retrieving case comments from Appian via API, updating them in the RTMS Mainframe and SQL Database, and developing a reporting bot to send daily QC reports.
- 4. Project Title** : **QC Process for Update Comments Process**
Client : Blue Cross Blue Shield of Massachusetts (BCBSMA)
Application used : RPA – Blueprism, Mainframe Application, Excel, Web Application
Briefing : The process involves validating member information and comments in a third-party application for QC. If discrepancies are found, a Business Exception is sent. After correction, the QC bot reprocesses the case. Additionally, a reporting bot sends daily QC reports, that helps business team efficiency.
- 5. Project Title** : **Provider Suppression and Un-Suppression**
Client : Blue Cross Blue Shield of Massachusetts (BCBSMA)
Application used : RPA – Blueprism, Excel, Sympler Web Application, Salesforce API
Briefing : The Provider Suppression and Un-Suppression process automates checking/unchecking the 'Directory Exclusion' checkbox in the Cactus Application based on Excel inputs. This bot reduces errors and cuts down manual efforts from 10 min to 2 min and generates a report for review.
- 6. Project Title** : **Invoice Processing Workflow**
Application used : RPA – Power Automate Desktop, Outlook, PDF
Briefing : Invoice Processing Automation simplifies the entire workflow — from receiving invoices via email to recording them in the ERP system. The Bot automatically extracts key details from PDFs, validates the data, and inputs it seamlessly using Power Automate Desktop. It then generates an Excel report and sends a summary email, significantly reducing manual effort, minimizing errors, and improving overall efficiency.
